ERGONOMIC

EVALUATION

ASSESSMENT

WHY ERGO?

Workplace ergonomic evaluations help employers recognize ergonomic hazards caused by workplace layout or design.

A proper workplace set up can help to reduce employee fatigue, stress, and injury.

The most common evaluations done in the school district setting are with employees who work at a desk with a computer, and bus drivers.

Support a new employee with their initial set up or help improve a seasoned employee's existing space.

WHAT TO EXPECT

- Ergonomic assessments typically take 15 to 30 minutes.
- Employees in need of an ergonomic evaluation are requested to contact their supervisor.

- The supervisor will contact the Workers' Comp Trust Safety Team to schedule.
- Upon completion of an ergo evaluation, ESD safety team will provide the ergonomic recommendations to the employee's supervisor or designee.
- The supervisor can then review the recommendations to determine what changes to implement.

Help the work station fit the employee with an Ergonomic Evaluation Assessment!
